Prodigy Infotech   *Pune*

- Developed Portfolio, Tic-Tac-Toe, Whether Forcast and some basic Web applications.
- I have learned intermediate-level React framework during a 1-month of virtual internship.
- Technology used during internship: ReactJs , Javascript, TailwindCSS , CSS ,NodeJs , ExpressJS , Rest API .

PROJECTS

Weather-Forecast-Web Application It provides climatic details about every city based on user search it is basic functionality but I am working to elaborate more and do something extra. (Source Code)

Portfolio It is a personal web application created using ReactJs, where I mention my project, personal information, education, resume and contact details. (Source Code)

Photography site It is a basic web application where users can download wallpaper for their purposes. I have used ReactJs with Api which is freely available based on that create a gallery for images (Source Code)
